

A tensile fabric hypar canopy attached to a wall

Victory

- Wide range of fabric colours available
- Fully adaptable including custom designs
- Warranted for ten years under tension
- ArcCan installation teams operate Worldwide

Victory is a versatile hypar shade structure designed to span between a suitable building and steel columns tensioned with backstays. Sizes for the Victory, range from 16 square metres to 100 square metres. The columns are available in tubular steel with cables or solid rod backstays and with either waterproof or porous canopies. Engineered to deal with inclement weather conditions the Victory range provides custom shading solutions to meet client's precise requirements.

Specifications

Victory

A tensile fabric hypar canopy attached to a wall

Framework

Heavyweight grade tubular steel columns zinc and powder coated to RAL colour of choice tensioned with galvanised or stainless steel cables or rods, specialized wall fixings with or without cold bridge connections, all fixings either A2/A4 stainless or galvanised steel.

Fabric

Architectural PVC coated polyester or knitted HDPE shadecloth patterned into a saddle 'hypar' shape with H/D boundary webbing, or S/S membrane plates and boundary cables tensioned with marine grade rigging screws.

Foundations

We provide loading figures for your engineer to design foundations to suit local ground conditions. Typical details available on request.

Files

3D CAD models are available on request.
